# Welcome to Eastern Idaho Technical College.

EITC is a comprehensive technical college operated under the authority of the Idaho State Board of Professional-Technical Education. Pre-employment technical programs and continuing education courses operate in response to the unmet needs of regional employers and the interests of the

students. EITC has a low student to teacher ratio, tutoring services, supervised work experience, and career placement assistance. Anyone seeking education leading to a new technical occupation or wishing to improve skills related to existing employment will benefit from EITC services
