

### **Question #3: How do I know if our company has jobs where the work is essential to products or services in any of the listed areas?**

The descriptions provided with each category below should help you determine if you have jobs that would fall within the category. Keep in mind the categories are not limited to the examples listed below.

<b>Renewable Energy and Alternative Fuels</b>
Manufacturing, production, construction, design, research, delivery, operation, storage and maintenance of wind, solar, biomass, hydro, geothermal, methane, nuclear and alternative transportation fuels such as ethanol and waste incineration as a fuel source.

<b>Energy Efficiency and Conservation</b>
Manufacturing, construction, installation, production of energy efficient products (such as Energy star rated appliances, more efficient lighting), energy efficiency services, weatherization, building retrofitting/efficiency, energy efficient production processes, energy distribution improvements (smart grid), transportation technology, and battery development and storage improvement.

<b>Sustainable Agriculture and Natural Resource Conservation</b>
Products and services to conserve, maintain and improve natural resources and the environment, including low carbon agriculture, land management, water management and conservation, wetlands restoration and environmental conservation. Includes bioscience related activities.

<b>Pollution and Waste Prevention, Reduction and Management and Environmental Cleanup</b>
Activities related to controlling commercial, transportation and industrial emissions and pollution; water treatment, recycling operations, waste product management and treatment. Includes controlling and reducing emissions of CO <sub>2</sub> , other greenhouse gases, waste water and other pollutants. Environmental remediation including the cleanup and disposal of pollution, waste and hazardous materials; Superfund/Brownfield redevelopment; and landfill restoration.
