Your unemployment claim has been identified as using federal wages during the shutdown of the federal government.

If you receive back pay for the time you were off during the federal shutdown, this income is reportable on your unemployment claim for the period the payment covers. Please contact us at (208) 332-8942 if you haven't already reported this income.

Reporting these earnings could create an overpayment, repayable to the Idaho Department of Labor. If an overpayment is created, please call the collections unit at (208) 223-3573 to make payment arrangements for your overpayment.

It is crucial that you contact us to report your income and repay any overpayment. Failure to make payment could result in a lien being filed against you and a garnishment of your wages.
