Workforce Trends

Population

The Boise metropolitan area encompasses Ada, Boise, Canyon, Gem and Owyhee counties. The area covers 11,738 square miles, 14.2 percent of the state, and varies from high desert to beautiful forests on rugged mountains to deep river canyons. Forty-one percent of Idahoans live in the metro area. It also holds the state's capital, Boise.

While population growth slowed to 1.1 percent between 2009 and 2010, the growth rate has increased yearly and now the area ranks as one of 20 fastest growing metro areas nationally. Population growth continued to increase between 2015 and 2016, with a gain of 2.3 percent. This improved growth rate is still considerably below the 2006 rate of 4.3 percent, the highest rate since the early 1990s. Since 2006, the metro area has grown by almost 121,000 or 21 percent. The state's two largest counties—Ada County and Canyon County—contribute 95 percent of the metro area's 691,423 people.

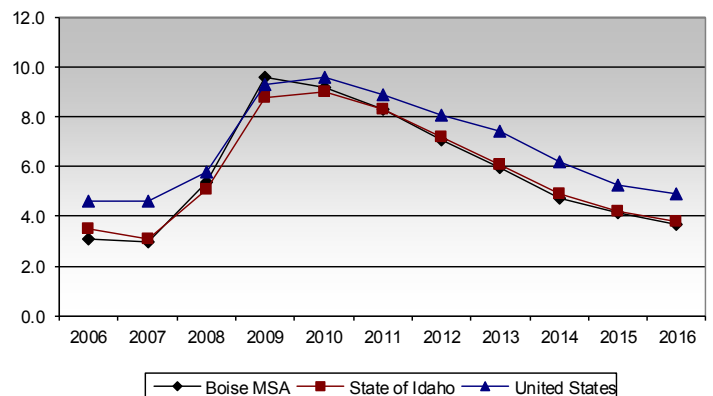

Labor Force & Employment

The Boise metropolitan area's labor force grew by over 10,000 from 2005 to 2006 before slowing considerably in 2007. The labor force began to regain strength in 2010 and is now 42,957—14.7 percent—above 2006 levels. The unemployment rate also improved to 3.7 percent in 2016, down 0.5 points from the year before. The 2016 rate is 5.9 percentage points below the record 9.6 percent in 2009.

The area continues to experience a strong recovery and added 12,447 covered jobs in 2016. Construction, which was devastated during the recession, recorded its first year over year gains in 2012 with an increase of almost 600 jobs. This growth has continued through 2016 with the industry adding almost 1,900 more jobs. Manufacturing, another sector that has had a rough decade, continues its year over year growth with an addition of 694 jobs in 2016.

Unemployment Rates

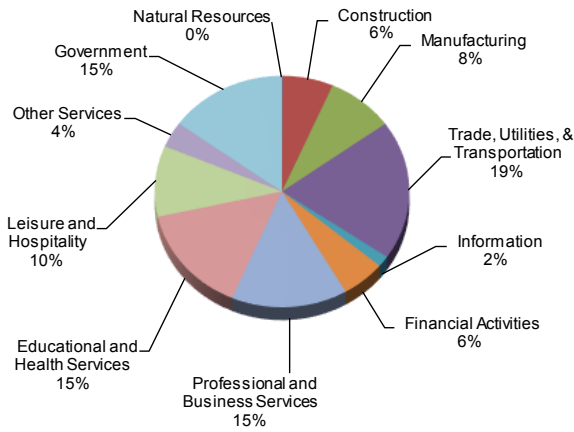

Only two industries experienced a decrease in covered jobs in 2016, agriculture and mining. The total job loss was only 46.

The winner for the most jobs added over the decade though goes to private education and health services, with 13,411 new jobs since 2006. From 2015 to 2016, professional and business services saw the most growth, adding more than 2,800 jobs. Over the decade, 24,700 jobs have been added.

Labor Force	Aug 16	Aug 17

Nonfarm Payroll Jobs for 2016

Per Capita Income, Nonfarm Jobs & Wages

The Boise metro area's per capita income continued its climb in 2015 to \$39,956, growing 3.4 percent over the previous year. This put the metro area 4 percent over the state but only 83 percent of national per capita income.

The region's nonfarm employment landscape is led by trade, utilities and transportation making up 19 percent of the areas employment. Three industries each account for 15 percent of the nonfarm jobs: professional and business services; education and health services; and government. This is not surprising given Boise is the largest city and capital.

In 2016, information and financial activities industries recorded the largest gains in earnings, \$3,051 and \$3,122 respectively. Two industries, mining and manufacturing registered a decrease in wages, down \$7,213 and \$1,351 respectively. Over the year wages increased by \$814 to \$43,282. Over the decade a 17.5 percent increase occurred or an additional \$6,457.

Major Private Employers
